

SMARTTAB™

Integrated Multimedia
Tabular Information
System

SMARTTAB™ will enhance the way you DISPLAY, UPDATE and ADVERTISE your information. It provides clear and accurate information to customers in a professional and elegant way.

With capability of displaying information in single or multiple display setups, SMARTTAB™ helps showcasing dynamic information in customisable design and layout, featuring easy to use and highly flexible software and non-proprietary hardware options.

- « Upsell your products and services with digital signage and running text
- « Flexibility to personalise number of columns, rows and designs
- « Display information in elegant tabular formats
- « Clear and vibrant display of information
- « Enhance your corporate profile

Suitable for:

- **Restaurants / Cafe**
To display menus and prices
- **Pharmacies**
- **Shopping Centres**
To display building directories or product offers
- **Hospitals / Clinics**
To display clinic, reception and waiting room directories
- **Training Centres / Universities**
To display building directories or exam timetables
- **Courts / Government Offices**
To display court or meeting schedules
- **Airports / subways / ferry terminals**
To display departure & arrival times
- **Recreational Areas**
To display compound directories, prices or package offers
- **and many more**

SMARTTAB™ allows the display of advertising or multimedia contents, along with the main information.

Users have full control of the content, including the looks, design and layout of the tabular display. They also have full advantage of the ample screen space and full-colour capability to display dynamic information, including multiple scrolling text and running text.

FEATURES

- Display unlimited number of information in portrait or landscape
- Manually update tabular information easily through wired/wireless web portal local or centrally
- Non-proprietary system and compatible with any LCD of any size and brand in the market
- Capability to display multimedia advertising/information simultaneously along with tabular information
- Built-in running text

BENEFITS

Reduce Costs

Less effort and human resources needed to update the information on the displays.

Leverage Corporate Image

Increased visibility of corporate image with corporate logo display, advertisements and announcements in a professionally-designed interface.

Increase Business Exposure

Combined display system allows any other advertising or information to be displayed along with the main information. System can be used for full-screen advertising space display after business hours if needed.
